Experts for Environmental and Flow Sensor Solutions

Sensirion’s Innovative Sensor Solutions

- provide added security and increase your quality of life
- enhance the energy-efficiency of your applications
- make your application safer and more efficient

www.sensirion.com
Sensirion AG, headquartered in Staefa, Switzerland, is a leading manufacturer of digital microsensors and systems. An international network with sales offices in the US, Europe, China, Taiwan, Japan and Korea supplies international customers with standard and custom sensor systems solutions for a vast range of applications. Sensirion sensors can commonly be found in the medical, industrial and automotive sectors, analytical instruments, consumer goods and HVAC products. One of the hallmark features of Sensirion products is the use of its patented CMOSens® Technology, which permits intelligent system integration of the sensor element, logic, calibration data and a digital interface on a single chip. Sensirion’s credentials are underscored by its loyal customers, quality reputation and top customer pedigree.

**ENVIRONMENTAL SENSORS**
- Humidity
- Temperature
- Multi-Pixel Gas
- CO₂
- PM2.5

**FLOW SENSORS**
- Differential Pressure
- Liquid Flow
- Gas Flow

**QUALITY AND SUSTAINABILITY**
Sensirion endeavors to ensure that its products and services meet the most stringent quality standards — after all, reliable delivery and flawless products are a basic requirement for high customer satisfaction. In March 2008 we gained the ISO/TS 16949 certification, which complemented and expanded our ISO 9001 quality certification of October 2003. Furthermore, Sensirion achieves Silver Status in the EICC Audit program, thus committed to continual improvements in labor law, occupational safety, environmental protection and ethics.

**SENSIRION WORLDWIDE**
Sites all around the world and a seamless distribution network mean we can be local to any customer anywhere in the world in order to provide the best possible support at every stage of the project.
